

WELCOME TO THE GRAND CIRCUS FRONT-END DEVELOPMENT BOOTCAMP!

Welcome to the Front-End Bootcamp! Unit 1 is designed to give you a solid base in HTML and CSS as well as a preview of JavaScript so we can move quickly and confidently when the classroom weeks begin. Completing Unit 1 is critical to your success in the bootcamp, so start early and invest time in this material. There will be an assessment on Day 1 of the Bootcamp to make sure that everyone's at the same starting point before we go off running into Front-End!

We want you to try to learn this material on your own, but there are plenty of resources available to help you. The first of these is Google - [it's not cheating to use Google](#). Developers of all skill levels are constantly using Google. StackOverflow is your friend. The second major resource is Slack's unit_1 channel. Grand Circus bootcampers and instructors alike are in the unit_1 channel, ready to answer your questions!

1	HTML: Preliminary setup and a foundation in core HTML concepts.	3 hours
2	CSS: A foundation in core CSS concepts, mobile responsiveness, and Flexbox	5 hours
3	Git/Github: A first look at Git and Github, important tools for managing your code and collaborating.	1 hour
4	Deliverable 1: Part 1 of the capstone to your Unit 1, a portfolio site.	10 hours
5	JavaScript: A first look at JavaScript fundamentals such as variables, conditional logic, and loops.	5 hours
6	Deliverable 2: Part 2 of the capstone to your pre-work, you will be solving a series of code challenges in JavaScript.	10 - 15 hours
